

The purpose of this assignment is to demonstrate functionality of templating engine in order to organize your views effectively. You will create a master layout that will include HTML template, define content section within the layout and render views using controller methods.

Models

Please use models from programming assignment 7, **Location**, **Story**, **Tag**.

Time to code

Useful information: <https://laravel.com/docs/5.2/blade#template-inheritance>

1. Create a master page layout called **page.blade.php**
 - a. Include **content** section within the layout
2. Modify your **stories.blade.php** and **locations.blade.php**:
 - a. Both views should extend master page layout
 - b. Both views should have **content** section

What to submit:

Please update your fork of **NYU-CS6015/Programming-Assignments**. Place your:

- routes.php
- StoryController
- LocationController
- locations.blade.php
- stories.blade.php
- Screenshots of:
 - 192.168.10.10/locations as **locations.png**
 - 192.168.10.10/stories as **stories.png**

files in **Programming Assignment 8** directory. **Do not forget to commit** your programming assignment!

No need to create pull requests.
